

ICS/SCADA DEFENSIVE AND OFFENSIVE STRATEGIES

The trainees will detect and analyze malwares in the OT environment in class The trainees will detect, analyze and handle real-live cyber incident on their OT environment

Days: 5

Trainees: 15

Level: Advanced

Topic: IR

Sector: OT

Sub Sector: Generation

Description

In the third and final week of our certification program, we focus intensively on the Operational Technology (OT) environment. This five-day training includes OT-specific materials, practical exercises, and Advanced Persistent Threat (APT) scenarios. Designed to consolidate your learning, this week challenges you to apply your knowledge in real-world OT security contexts, demonstrating your expertise in this critical field. Prepare to bring all your skills into action and achieve mastery in OT security.

Target Audience

- IT/OT Professional
- Junior OT security personnel in process of qualification

Training Outcomes

- The trainee will mitigate and handle a cyber incident

Mandatory Prerequisites

- Cyber Forensics Principals
