

OT AWARENESS - MANAGEMENT

The trainees will gain understanding of the hacker POV The trainees will understand the concept of the IR team The trainees will experience a live APT in the OT sector

Days: 1

Trainees: 10

Level: Beginners

Topic: Awareness

Sector: OT

Sub Sector: Generation

Description

This training is tailored for OT personnel within the organization, comprising two lectures on cybersecurity concepts and attacker perspectives. Following the lectures, trainees will experience an Advanced Persistent Threat (APT) simulation from both the red (attackers) and blue (defenders) sides. They will learn effective response strategies using SIEM tools and other options to mitigate attacks, minimize damage, and facilitate quicker recovery processes. Technical depth will be emphasized to enhance understanding of system behaviors and appropriate actions during cyber incidents.

Target Audience

- IT/OT Professional
- CISO - Chief Information Security Officer
- Decision Makers
- Executive Leadership (CEO, Board of Directors)
- Technical personnel in the fields of OT

Training Outcomes

- Gain understanding and knowledge of the latest security developments in cyberspace
- Experience all stages of a complex cyberattack targeted against organizations

Mandatory Prerequisites

- Be familiar with general networking principles, architecture and protocols
