

RED & BLUE POINT OF VIEW (OT)

The trainees will experience and differentiate how the attacks are delivered and appear from both the blue and the red side. The trainees will understand the reasons for the specific attack sent from the attacker's point of view and understand how to deal with it relying on the specific framework. (MITRE ATT&CK, APT)

Days: 1

Trainees: 15

Level: Beginners

Topic: Awareness

Sector: OT

Sub Sector: Generation

Description

During this training, the trainees are going to experience the APT from the blue side - as the team that "feels" the attack, and also will be able to see how it looks from the red team side - as the attackers. This will complete the "grand picture" of an APT. Once they are able to have better understanding of the two sides, the protection and action measurements that they will apply in their companies will be more efficient. This training serves as an awareness training and also management and decision-making training. It can apply to all level of workers.

Target Audience

- CISO - Chief Information Security Officer
- Decision Makers
- Cyber Forensics Personnel
- General employees
- IT/OT Professional
- SOC Analyst
- Incident Response Team Member

Training Outcomes

- Acquire critical knowledge required to successfully manage a cyber crisis
- Experience all stages of a complex cyberattack targeted against organizations
- Gain familiarity with the internal processes and stages of a cyberattack

Mandatory Prerequisites

- OT background
