

AI & Cybersecurity Workshop

This workshop provides an in-depth look into the transformative role of AI tools in the cybersecurity landscape of 2023. As AI applications continue to evolve and shape various industries, understanding their potential and implications in cybersecurity has never been more crucial.

Participants

- IT/OT Personnel, Incident Response Team Members, SOC Analysts
- CISOs and Decision Makers

Prerequisites

Basic understanding of AI and cybersecurity concepts

Training Outcomes

- In-depth understanding of the latest AI tools and their impact on cybersecurity
- Insights into the evolving landscape of AI-driven cybersecurity threats and solutions
- Mastery in leveraging AI tools for enhanced cybersecurity measures

Duration

- Half a day
