

Instill cybersecurity concepts in your staff in a highly-effective way, as you push their security skills to the limit.

Training Outline

Capture-the-Flag – Offensive Training

Studies show that interactive methods of teaching are more effective than traditional classroom teaching, and when it's fun as well as immersive, it's even better!

CybergymIEC's Capture the Flag (CTF) training challenges trainees to solve a variety of tasks, using different tools and methods, as they seek out and collect 'flags' secretly hidden in the system. Focused on the cyber offensive and attack point of view, different levels within each challenge keep participants on their toes.

Participants

- IT Cyber Security Staff
- Penetration Testers
- Tier 1-3 SOC Personnel
- Developers

Prerequisites

- Basic knowledge of cyber security, networks, offensive cyber and attacks, and penetration testing

Training Outcomes

- Enhanced understanding of how to research, analyze, and find access points throughout your networks

Duration

- One 8-hour day
