

Equip your team with the knowledge and skills to tackle the most prolific ransomware, LockBit.

Training Outline

LockBit Ransomware Response Training

This training session provides the essential knowledge, skills, and techniques required to effectively respond to a LockBit ransomware attack in your organization.

During the training, participants will learn about the workings of LockBit, how to detect and analyze it, and the correct actions to take in response. They will also gain hands-on experience in our state-of-the-art cyber training environments, CyberGround, CyberPod, and Virtual Cloud Arena. Your team will finish the training with invaluable insights into effective ransomware response, digital evidence collection, and cyber incident investigation.

Participants

- SOC Analysts, IR Team Members, IT Personnel, Cyber Security Personnel Managers, and C-Level Executives

Prerequisites

- IT background, IR Principal Tactics training, Essentials Intrusion Detection - SOC Tactics

Training Outcomes

- Acquisition of critical knowledge required to successfully manage a cyber crisis
- Ability to react and perform the correct actions in case of a ransomware attack
- Skills to analyze a compromised system and mitigate the threat
- Proficiency in collecting digital evidence for a cyber incident investigation

Duration

- 1 day
